

100% Made in Sweden. With signature.

100% of the Woolpower production is made in Sweden. Ever since the manufacturing of Ullfrotté Original once started, in Östersund in northern Sweden 1972, the production has been located here. The seamstresses who sew these garments, from start to finish, each add their signature.

Today, there are 36 employees in the Ullfrotté AB factory. The number of employees has increased by almost 25 per cent since 2005. Everything is produced in Östersund in northern Sweden, from yarn to finished product. Ullfrotté AB is one of very few Swedish textile companies to keep the entire manufacturing process in Sweden.

“There are some great advantages with local production”, says Adam Brånby, President and CEO of Ullfrotté AB. “We maintain full control over the production and can ensure that our high quality demands are met.”

Quality is one of the most important principles at Ullfrotté AB. One single seamstress is responsible for all the sewing steps of a garment, and she guarantees the product’s quality by sewing in a label bearing her name.

*Martha Persson is one of the seamstresses at Ullfrotté AB.
You can find her name at Woolpower products worldwide.*

The company Ullfrotté AB produces thermal undergarments and mid-layer garments in terry-loop knit Merino wool, using the material Ullfrotté Original.

The garments are manufactured in Östersund, Sweden, since 1972 and sold worldwide under the brand name Woolpower.
